

SEPATON helps The Global Tivoli User Community usher in our new website by becoming our newest website sponsor!

Jersey City, NJ December 2008 -- The Global Tivoli User Community (TUC) and Group Intelligence, Inc. is pleased to announce [SEPATON, Inc.](#) as the newest platinum sponsor of the newly redesigned global community website.

SEPATON is one of the industry leaders in delivering data protection solutions. For most enterprises, data protection means far more than simply backing up data. It means backing up large volumes of data in locations worldwide, while navigating shrinking backup windows. It also means: * Meeting regulatory requirements, * Staying ahead of exponential data growth, * Being "green" by cutting power and floor space consumption, * and Planning for the future. That's why more and more of the world's largest enterprises rely on SEPATON virtual tape library and deduplication solutions for their data protection. SEPATON goes beyond simply storing backup data to help enterprises reduce risk and improve operational efficiency in the data center. SEPATON's ContentAware data protection approach combines advanced technology design, proven methodologies, and in-depth expertise to help enterprises address their growing data protection challenges.

"Sponsoring the Global Tivoli User Community is an excellent opportunity for us to continue to create close connections to those with whom we do business. As proponents of customer collaboration, SEPATON is excited to be supporting the online and offline collaborative services and overall community effort driven by the members of the Global Tivoli User Community," said **Miklos Sandorfi**, chief technology officer, SEPATON, Inc.

As part of the sponsorship, SEPATON has also been included in the [Tivoli Member and Vendor Partnering Zone](#) and will be posting updated information on their news, upcoming events and product information.

More about the Global Tivoli Software Community (TUG):

The TUG Community is a network of over 134 User Groups around the world, comprising over 20,000+ community members. The TUG website is the information and community hub for User Groups, Business Partners, IT professionals and business users. It is a diverse and knowledgeable network of members engaged in local and global collaborative activities related to IBM Tivoli software. Members include IBM Tivoli customers, developers, IBM business partners, consultants and IBMers (technical, support & sales). Please visit the TUG community at www.tivoli-ug.org

Group Intelligence Inc. and The Global Tivoli Software Community:

Group Intelligence (GI) is a U.S.-based "web 2.0" firm that specializes in community-based ecosystems and business collaboration services for the technology market. GI has been operating "eCommunities" since 2000. In 2002, the company launched The Global Tivoli Community, and continues to play a leadership role in driving membership growth, increasing community vitality and advancing the community's evolution.

About SEPATON, Inc.

SEPATON helps enterprises reduce risk and improve operational efficiency in the data center with the industry's fastest, most scalable virtual tape library and data deduplication solution. Built on our patented ContentAware architecture, SEPATON products enable enterprises to consolidate and protect information by deduplicating, backing up and restoring petabytes of data at wire speed without disruption to their existing infrastructure. We combine these products with proven methodologies and in-depth services expertise to deliver a measurable return on investment.
